RE: REMOVAL OF THREE 50,000-GALLON UNDERGROUND STORAGE TANKS FROM THE
FUEL DEPOT LOCATED AT THE FORMER NAVAL WEAPONS INDUSTRIAL RESERVE
PLANT (NWIRP) CALVERTON, NEW YORK

Dear Mr. Leung:

The Navy is enclosing a copy of the Post Removal Report for the excavation and disposal of three 50,000-gallon underground storage tanks (USTs) for your information. This report documents the excavation and disposal activities that occurred during the removal of the tanks in August 1997. These tanks were used to store jet fuel in support of aviation operations and were located at the former NWIRP Calverton Fuel Depot.

The Fuel Depot is also designated as Site 7 under NWIRP Calverton's Installation Restoration (IR) Program. Since a Phase II RCRA Facility Investigation (RFI) was also being conducted at the site, post excavation soil sampling and analysis were the responsibility of the C.F. Braun Corporation (Brown & Root Environmental). Therefore, the results of the post excavation sampling will be presented in the Navy's upcoming Phase II RFI Report. A draft version of this report is expected to be submitted in January 1998.

A copy of this report was also sent to Mr. Michael Seaman of the Suffolk County Department of Health Services who also provided oversight during the removal of the tanks.

If you have any questions regarding the enclosed document or would like additional information, please give me a call at (610) 595-0567, ext. 163.

Sincerely,

JAMES L. COLTER
Remedial Project Manager
by direction of the
Commanding Officer
